

Fujimi Corporation Receives Intel's Supplier Continuous Quality Improvement (SCQI) Award

Posted March 10, 2017

Fujimi Corporation has been recognized by Intel as a 2016 Supplier Continuous Quality Improvement (SCQI) award winner.

The SCQI award is Intel's most distinguished supplier recognition, granted to an elite group of suppliers that has achieved the very highest standards of quality, cost, availability, technology, customer service, labor and ethics systems, and environmental sustainability.

"On behalf of Intel, I congratulate Fujimi Corporation on their 2016 Supplier Continuous Quality Improvement award," said Robert Bruck, Corporate Vice President and General Manager of Global Supply Management at Intel. "Intel is extremely proud of our award-winning suppliers, as they demonstrate the very best performance among one of the world's most elite supplier communities. The close collaboration with these suppliers has been vital to making smart and connected devices run best on Intel's industry leading technologies."

The SCQI award is the company's most distinguished supplier recognition. It is granted to an elite group of suppliers that has achieved the very highest standards of quality, cost, availability, technology, customer service and sustainability. To qualify for SCQI status, suppliers must exceed the highest expectations and aggressive performance goals while scoring at least 95 percent on an integrated report card that assesses performance throughout the year. Suppliers must also achieve 90 percent or greater on a challenging improvement plan and demonstrate outstanding quality and business systems.
